

## 5794-13-8, L-Asparagine

Spectrum Chemical stocks L-Asparagine Monohydrate along with a wide selection of other high-quality items. A white to off-white crystalline powder, L-Asparagine Monohydrate is an amino acid that is naturally occurring and can be synthesized for chemical laboratory use. Sometimes referred to as H-Asn-OH Monohydrate or alpha-Aminosuccinamic acid, this product is stable, non-corrosive in the presence of glass and is a slight irritant to the skin and eyes.

Molecular Formula	Molecular Weight	CAS Number
