

628-21-7, 1,4-Diiodobutane

This alkyl halide, also known as tetramethylene iodide, presents as a very pale yellow to reddish yellow liquid. Store under inert gas and in a cool and dark place at ambient temperatures. This substance is both light sensitive and air sensitive. 1,4-Diiodobutane is known to be incompatible with oxidizing agents and should not be stored or handled in their vicinity.

Molecular Formula	Molecular Weight	CAS Number
$\text{I}(\text{CH}_2)_4\text{I}$	309.92	628-21-7
