

## BrandTech\* Dispensette\* S Organic, Analog Adjustable Bottletop Dispensers

**Description** • Dispensette\* S Organic Analog Adjustable Bottletop Dispensers are the safest and most convenient ever, while retaining the standard Dispensette\* bottletop dispenser features

- The "floating piston" design forms a zero-wear sealing system with outstanding sliding properties
- Optimized flow channels make dispensing and priming even easier - particularly in instruments with large volumes
- Simple to mount discharge tube available with or without integrated recirculation valve†
- Designed without additional sealing rings for ease of cleaning and maintenance
- Replaceable discharge valve with safety valve
- Olive-shaped filling valve for firmer attachment of filling tubes
- Improved flow technology results in faster priming
- Scalloped track for secure volume setting on analog dispensers
- Large viewing window for easy priming verification
- Hinged screw cap swings out of the way when dispensing
- 360° rotating valve block with GL 45 thread
- Recirculation tube for discharge tubes with recirculation valve†
- Telescoping filling tube for easy height adjustment without cutting

The Dispensette\* S Organic bottletop dispenser is supplied with: discharge tube, valve mounting/calibration tool, polypropylene adapters, telescoping filling tube, recirculation tube (optional), performance certificate, operating manual, and one year warranty.
