

## I-Chem Economy Processed VOA Glass Vials with Septa

- Description** • Keep costs low while eliminating the need to wash vials in-house
- These Processed VOA Glass Vials with Septa feature no-frills packaging but the peace-of-mind you get with more costly certified vials
  - Bulk packed glass-to-glass in shrink-wrapped trays
  - No barcoding or other add-ons
  - Vial designed for water sample collection for volatile organic analysis (VOA)
  - Vial shoulder slope optimized to prevent air bubble entrapment
  - Clear or amber vials; Amber is recommended for light-sensitive analytes
  - Available in the standard 40 mL size
  - Open-top white polypropylene cap with choice of standard 0.125 in. septum or thinner 0.060 in. septum
  - Caps with 0.125 in. septum are not bonded, allowing septum to be replaced as needed
  - Caps with 0.060 in. thinner septum are bonded to ensure a secure seal and prevent unseating when punctured
  - Directly compatible with automation; thin septa vial is optimized for easy needle puncture
  - Closures assembled to vials
  - Economically packed glass-to-glass in shrink wrapped trays, bulk 144/case
  - Processed to meet or exceed EPA performance-based standards for volatile organic analysis; no certificate
