

## I-Chem Wide-Mouth VOA Glass Jars with Closure

**Description** • Type III soda-lime glass bottle, clear or amber

- Amber jars are recommended for light-sensitive analytes
- White polypropylene closed-top cap with bonded PTFE liner that can't fall out
- Caps assembled onto bottles
- Wide mouth design is ideal for soil samples and viscous liquids
- Available Certified or Processed

Certified jars come with the following features:

- Certified to meet or exceed EPA performance-based standards for volatile organic analysis
- Certificate of Analysis (CofA) included in the case and barcoded with lot number for traceability
- Each bottle individually barcoded with lot number and unique container number
- Analysis labels included unattached for optional use
- Carton sealed with security tape providing tamper evidence
- Chipboard divider helps protect jars from breakage; requires additional over-pack for shipping

Processed jars are processed in the same manner as certified jars and come with all the features of Certified jars, but jars are not barcoded, and CofA is not included.

Image(s) are representative of the product group and not necessarily the individual product.
