

Labconco RXPert Double Filtered Balance Systems

Description • Designed for the pharmaceutical market

- Double HEPA filtered enclosures are suitable for locations where an outside duct is not possible or desired
- Space-saving design constructed of a static-dissipative, powder-coated aluminum frame, steel rear plenum & baffle, and tempered safety glass
- Exhaust HEPA filter, 99.99% efficient on particles 0.3 micron in size (5 and 6 ft. models require two)
- Provides safer filter replacement using its true bag-in/bag-out HEPA filter disposal system
- Double HEPA models have separate bag-in/bag-out systems for each filter and both can be scanned independently
- Replacement bag for bag-in/bag out HEPA filter available (5 and 6 ft. models require two)
- Class I Enclosure meets the USP requirements for non-sterile compounding
- Provides user protection by keeping powders and particulates contained during hazardous drug manipulation
- All models include a built-in analog airflow monitor
- All listed models below are 115V, 60 Hz (230V models are available with CE Conformity Marking)
- Select models include a stainless steel or solid epoxy work surface
- Sash opening height is 9.4 in. (12 in. on Tall models)

All Models Require:

- Supporting base
- Work surface (if not already included)

Image(s) are representative of the product group and not necessarily the individual product.
