

## Topi-CLICK 35 Light SAFE UV Blocking Topical Dosing Dispensers

**Description** • Blocks light most likely to damage medications: UVA, UVB, and Violet light

- Topi-CLICK 35 is designed to overcome the various limitations associated with tubes, tubs, syringes, and jars
- Accurately measure and apply topical medications to intended areas
- Decreased risk of improper dosing and contamination
- CLICK-Assist Patient Feedback System improves patient compliance and therapy outcome with stronger audible CLICKs, heavier tactile dosing sensations, and improved visual indicators
- Friction-free, domed applicator pad with an ergonomic design provides a comfortable experience when applying medication
- Dispenses 0.25 mL per click
- **35 mL total capacity**

### STANDARDS AND QUALIFYING PROCEDURES:

The techniques described in the following standards, as they apply to Moisture Vapor Transmission and Light Transmission, were used to test these samples.

- US Pharmacopeia USP39/NF34 Supplement 1 Performance Testing (Light Transmission)
- US Pharmacopeia USP39/NF34 Supplement 2 Performance Testing Method 1 (Moisture Vapor Transmission)

For general laboratory practices concerning UV measurements, the following standards are utilized for guidance in practical methods for the measurement of UV light:

- ASTM E275 - 08 Describing the Measuring Performance of Ultraviolet Spectrophotometers
- ASTM E169 - 04 (2009) Standard Practices for General Techniques of Ultraviolet Quantitative Analysis
