

## 3M Curox Disinfecting Cap for Needleless Connectors

### Description Features:

- Disinfects and protects needle-less connectors
- Helps reduce the risk of contamination from entering the I.V. port through the catheter, post-insertion
- Protects for up to 7 days if not removed
- Curox products have a distinctive green color that allows clinicians to verify and measure compliance

Image(s) are representative of the product group and not necessarily the individual product.
