

Diversified Biotech Lab-Sorb

Description • Reduces the possibility of accidentally spilling liquid waste

- Simple four step process takes less than two minutes
- Disposal bags and LabSorb granules can be used in conjunction with most 500 mL, 600 mL, 1 L and 2 L beakers
- LabSorb granules can rapidly absorb aqueous or mixed aqueous and organic solvent waste
- Convenient system includes extra durable disposal bags, super absorbent LabSorb granules and a convenient graduated scoop
- When spills do occur, use LabSorb for safe liquid containment during cleanup†
- Use at locations connected to septic systems to avoid pouring waste down the drain
- Put Lab-Sorb at the bottom of your biohazard bin
- Convert liquids to solids in seconds
- One jar of LabSorb can absorb up to 50 liters of liquid
- Retains liquid during autoclaving

†Always follow proper safety protocols
