

Globe Scientific

Description • FanPads are super absorbent pads that are specially treated with Formalex liquid control agent to eliminate the hazardous vapors of formaldehyde, 10% formalin and glutaraldehyde solutions

Specifications

- Available in three convenient sizes: mini, small and large
- Excellent for lining trays or containers when transporting tissue within or between institutions
- Fan Pads make tissue handling safer and easier by absorbing fluids and formalin vapors during gross dissection
- Fan Pads can be used as a work surface for the placement of tissue cassettes after their removal from formalin or the tissue processor
