

Foxx Life Sciences EZwaste HD 2.5L Closed System for HPLC Solvent Waste, HDPE Reusable Carboys

Description • These 2.5L systems allows for the safe and effective collection of waste in the laboratory

- The safety and ease of use for laboratory technicians is a high priority
- The closed-loop design prevents inhalation of volatile organic compounds
- The EZwaste Solvent Waste System is designed to be an affordable solution for containing liquid chromatography waste
- Each system is manufactured to safely collect waste from two HPLC machines
- This system features an activated carbon filter, which traps volatile organic compounds from being released into the air
- This prevents chemicals from being inhaled by lab workers, and provides an easy mechanism of disposal for vapor wastes
- The EZwaste Solvent Waste System also features a closed-loop design, which protects against leaks and spills, improving overall lab safety

- Each EZwaste Solvent Waste System comes with two 83 mm VersaCap (one open top for waste collection and one closed top for safe transport), fittings, plugs for unused ports, and a chemical exhaust filter
- Depending on application, carbon exhaust filter life cycle may vary
- Tube fittings secure waste tubes to carboy, providing the closed system necessary to prevent spills
- A 90° adapter is included for maximum storage flexibility
- A replaceable sulfur cured EPDM gasket is included for high chemical compatibility against aggressive organic solvents. Each system is manufactured to safely collect waste from two HPLC machines
- This system features an activated carbon filter, which traps volatile organic compounds from being released into the air
- This prevents chemicals from being inhaled by lab workers, and provides an easy mechanism of disposal for vapor wastes
- The EZwaste Solvent Waste System also features a closed-loop design, which protects against leaks and spills, improving overall lab safety
