

Heathrow Scientific Sprout Portable Centrifuge Transport Case

Description The DuraPorter transport box is ideal for holding and storing a variety of laboratory equipment and samples. The transport box has superior durability being constructed of polycarbonate material that helps to protect the components inside while on the move and if the unit is dropped. Even in unfavorable weather conditions, or when on or near water, samples remain safe as the transport box includes a silicone water-tight seal and three lid clasps to provide a secure closure that can even be locked with a zip tie. Specially designed insert to seat the Sprout Plus Mini Centrifuge, all its accessories and incorporates a 16-Place microtube rack (all sold separately or available in the Portable Centrifuge Kit (Cat. No. 480-43962)

DuraPorter Transport Box
