

## KleenGuard A20 Breathable Particle Protection Aprons

**Description** • KleenGuard A20 Breathable Particle Protection Aprons help protect against hazardous and non-hazardous dust

- These protective garments are one size fits all (universal size) and feature a tie in the back
- The A20 fabric is made of the breathable Microforce barrier SMS fabric, which helps protect against hazardous particles and this apron model is coated with polyethylene
- These aprons tie in back for easy donning
- Each protective apron measures 28 x 46 inches
- Passes NFPA 99 for antistatic (anti stat) materials

Image(s) are representative of the product group and not necessarily the individual product.
