

## I-CHEM 40 mL Clear Vials with 0.060 in. Thin Septa

**Description** • Clear vials with thin (0.060 in.) PTFE/silicone septa

- Thin septa are ultrasonically bonded to the 24-414 polypropylene closures and easily punctured with syringe needles
- No adhesives are used
- Series 200 and 300 vials are guaranteed to meet the EPA's Performance Based Specifications for Volatile Organic Analysis
- TOC-certified. Series 200 vials are not supplied with a certificate of analysis (but can be obtained by request) or barcode labels
- Series 100 vials are made of the same materials and subject to the same material specifications as the Series 200 and 300; but they are not processed, certified or barcode labeled; analysis labels are not included
- Closure size (mm): 24-414

Image(s) are representative of the product group and not necessarily the individual product.
