

## 3D Floor Shakers

**Description** • This shaker eliminates time-consuming and tiring shaking of large vessels by hand

- Vigorously shakes large (up to 4 L) separatory funnels
- 3D motion circulates liquid up, down, sideways, and around for effective mixing
- Excellent for hemolyzing blood, water pollution analysis, or drug analysis
- Shakes up to eight 2 liter funnels; no balancing required
- Spring-loaded stopper restrainers prevent spillage during shaking
- Rack design minimizes strain on drains and stopcocks and reduces the possibility of broken glassware
- 120V
