

Vee Gee Scientific Specific Gravity, ASTM Hydrometers, 260 mm

Description • Manufactured in strict accordance to specifications of ASTM (American Society for Testing and Materials) for accuracy and design

- All instruments are suitable for certification for use as a primary reference standard with NIST traceability
- Calibrated at 60°F

- Specific Gravity, also known as relative density, is the ratio of the mass of a solid or liquid to the mass of an equal volume of distilled water
- The standard temperature of calibration in the U .S. is 60°F/ 60°F

Optional Accessories (sold separately):

- PVC Hydrometer Case, 13.5 in. (Spectrum Cat. No. 352-10027)
- Certification Traceable to NIST (Spectrum Cat. No. 350-45652)

Note: NIST Certification must be ordered at the same time as the hydrometer

Image(s) are representative of the product group and not necessarily the individual product.
