

Corning PYREX Blunt Imhoff Sediment Cones

Description • For use with heavy sediments, where ability to read small volumes is unimportant

- Graduated from 0 to 1 mL in 0.1 mL divisions, 1 to 10 mL in 0.5 mL and 10 to 40 mL in 1 mL; also marked at 1000 mL
- The blunt tip increases its ruggedness and cleaning ease

Image(s) are representative of the product group and not necessarily the individual product.
