

## Biospec Tissue Grinder Accessories

**Description** • Tissue grinders are designed to gently homogenize fresh, soft tissue in an excess of an appropriate solvent

- This Biospec all stainless-steel mortar and pestle (Potter-Elvehjem style) tissue grinder provides superior temperature control and greater plunger forces without the danger of shattering glass
- Less effort required to achieve complete homogenization because of the precise 0.1 mm clearance between the smooth walls of the pestle and tube
- The Tissue Grinder has a working volume of 5-15 mL and comes with a removable, broad base for convenient upright standing during use and easy cleaning afterwards
- 21 cm X 5 cm, 0.5 Kg
- Type 316 stainless-steel construction
