

Edge - Nitrile Coated Knit Lined Gloves

Description • Like the name implies, Edge gloves have a decisive edge over ordinary cotton and leather gloves. In fact, Edge gloves outwear 8-ounce cotton gloves by 10 to 1

- Besides offering superior snag, puncture, abrasion, and cut resistance, the unique porous nitrile coating is soft, flexible, and actually molds to the hand for greater dexterity
- In addition, the porous nitrile provides excellent grip in oily applications by channeling the oil away from the glove surface

Applications:

- Fabrication
- Assembly
- Maintenance
- Shipping and receiving
