

## Endurosaf Aprons

**Description** • Exclusive Endurosaf Aprons offer a unique combination of characteristics that outperform traditional materials such as neoprene, nitrile, vinyl, and other films

- Endurosaf is lighter in weight, stronger, wears longer, and is exceptionally resistant to abrasions, chemicals, and deterioration from oils and fats
- It's also softer, easier to clean, more comfortable, and remains flexible in cold temperatures
- Plus, Endurosaf is environmentally friendly. It can be buried or incinerated without harm to the environment
- Component materials comply with FDA regulations for food contact

Applications:

- Cleanrooms
- Laboratories
- Food processing
- Chemical processing
- Pharmaceutical
- Janitorial
