

Nalgene Wide-Mouth HDPE Sterile Sample Bottles

Description • Thermo Scientific Nalgene Wide-Mouth HDPE Sterile Sample Bottles are guaranteed leak-proof and certified sterile for water sample collection for microbiological analyses

- The icon of quality, Nalgene containers are guaranteed to be leakproof and break resistant
- Durable construction withstands the rigors of field operations
- Recommended for collecting water samples for microbiological analyses
- Wide mouth for easy aseptic filling
- Certified sterile

Features:

- HDPE container with leak-proof polypropylene closure
- Leak-proof guaranteed
- Certified Sterile
- Caps assembled onto containers and individually shrink wrapped for tamper evidence and sterility assurance
- Packaged in shrink-wrapped trays
- Wide mouth for easy aseptic filling
- Recommended for collecting water samples for microbiological analyses

Certified sterile containers come with the following features:

- Certificate of Analysis (CofA) included in the case and barcoded with lot number for traceability
- Each container individually barcoded with lot number and unique container number
- Each closure individually sealed with tamper-evident shrink wrap
- Analysis labels included unattached for optional use
- Carton sealed with security tape providing tamper evidence

• Compliance: Certified sterile as well as for metals and water quality parameters; manufactured under an ISO certified quality management system
