

EP Scientific TOC-Free High Purity Specialty Water For Critical Environments

Description • TOC Water purity exceeds 17 MegaOhm resistivity with low organic and inorganic impurities at the time of packaging

- Processing includes reverse osmosis, activated carbon and ultraviolet TOC reduction
- Specialty Waters are packaged in pre-cleaned amber glass containers inside a class 10 environment to maintain product integrity
- Low TOC Water is filtered to 0.1 micron through hydrophobic membrane filters
- Low TOC Water is certified to contain

Applications:

- Sample and standard dilution
- Lab blank determination
- Equipment rinsing
