

Corning PYREX Small Top Desiccators

Description • These PYREX desiccators have a rugged 24/29 Standard Taper external sleeves with tooled hose connections that serve as the stopcock

- Designed so that manipulation is not affected by the vacuum
- The open position is indicated by the molded arrow on the cap
- A quarter turn from this position closes the desiccator
- For ease in use and improved performance, its recommended that the Standard Taper sleeve be lubricated with a silicone-based vacuum grease

- Warning: Do not heat or subject to pressure. Rated 1- atmosphere vacuum
