

## 3M ATTEST 48-Hour Biological Indicators for Steam

[SDS](#)

**Description** • Biological Indicator for steam 270°F/132°C vacuum assisted or 250°F/121°C gravity displacement sterilization cycles, 48 hour readout, Brown cap

- 3M Attest Biological indicators that monitor the effectiveness of the steam sterilization process and provide results within 48 hours
- The self-contained BI for 250°F/121°C gravity and 270°F/132°C vacuum-assisted steam cycles consist of a Geobacillus stearothermophilusspore strip; sealed glass ampule with growth medium and a bromocresol purple pH indicator system; brown color-coded cap with holes for sterilant penetration and a filter that acts as a barrier, and a process indicator on the label that changes from rose to brown when processed
- After sterilization, the vial is crushed to join the growth media with the processed spore strip
- The BI is incubated for 48 hours for a visual change readout. A color change to yellow indicates surviving spores and a positive result.

- Biological indicator vials are easy to use and interpret with visual color readout in 48 hours
- Attest Biological Indicator 1262 for 250°F/121°C Gravity and 270°F/132°C Vacuum Assisted Steam Sterilizers
- Use in conjunction with 3M Attest Biological Indicator Incubator 116
- Can eliminate recalls when used in every load
- 1262-S is designed for industrial sterilization applications (Not FDA Approved - Life Science Labs Only)

†Continental US+HI Only - No Exports
