

3M ATTEST 48-Hour Biological Indicator Test Packs for Ethylene Oxide

[SDS](#)

Description • Biological Indicator test pack for EO (ethylene oxide), 48 hour readout, Green cap

- A 3M Attest pre assembled, EO (ethylene oxide) plastic disposable test pack with an Attest 1264 biological indicator at the end of a tortuous or winding path
- The pack is used to monitor all EO (ethylene oxide) cycles
- The pack is designed to present a resistant challenge to the EO (ethylene oxide) sterilization process as is the AMMI routine syringe test pack

- Biological indicator vials are easy to use and interpret with visual color readout in 48 hours
- Self-contained biological indicators significantly reduce possibility of contamination, minimizing false positives and assuring more accurate results
- Test packs present a challenge to the sterilization process and meet AAMI routine test pack recommendations
