

## BrandTech BRANDplates pureGRADE Microplates

**Description** • pureGrade BRANDplates feature untreated surfaces for use in a variety of laboratory tasks, such as homogeneous assays, screening and storage

- 96-well format plates are available in U-bottom, V-bottom, F-bottom and C-bottom well shapes, in transparent, white, black, and transparent bottom versions
- 384-well plates are available in both standard and low-volume varieties in transparent, white, black and transparent bottom (standard volume only for transparent bottom), as well as a proprietary UV-transparent version offering enhanced chemical resistance
- 1536-well plates are available in transparent, white or black

• White and black pureGrade plates feature grey embossed alphanumeric codes for easy well identification, in addition to the identification of the pureGrade surface

### 96-well

- Packaging for single-color pureGrade plates is 20 stacks of 5 plates each (100 plates)
- Each stack contains one lid
- Transparent bottom pureGrade plates are packed as 4 bags of 25 plates each (100 plates)

### 384-well

- Single color standard volume pureGrade plates are packed in 5 bags of 10 plates each (50 plates). Each stack contains one lid
- Low-volume and transparent bottom plates are packed 2 bags of 25 plates each (50 plates)

### 1536-well

- All pureGrade plates are packed as five stacks of 10 plates (50 plates)
- Each stack contains one lid
