

## Benchmark Scientific BeadBug 3 Microtube Homogenizer

**Description** • The BeadBug is a high energy benchtop homogenizer that sets the performance standard for personal sized cell disruption and lysis instruments

- Simultaneous homogenization of up to 3 samples takes place (often within 45 seconds) inside the disposable 2 mL screw cap microtubes
- The optimized mixing motion causes rapid cell disruption through constant high velocity impact from the hardened micro-beads chosen specifically for your sample type
- Developed for samples too tough to be homogenized in a common lab vortexer
- With up to three tube capacity and a foot print of just 7 x 8 in., the BeadBug is the ideal homogenizing instrument for low to medium throughput laboratories

- Extremely powerful mixing for lysis, grinding or homogenization
- Faster and more effective than tissue grinders
- Mix 1, 2 or 3 tubes simultaneously
- Extremely compact, less than 7 in. wide
- Eliminates the cross contamination associated with hand held homogenizers

### Specifications:

- Speed range: 2700 to 4000 rpm
- Capacity: 3 x 2.0 mL (screw cap/non-skirted tubes)
- Timer: 3 sec. to 3 min.
- Dimensions: 6.9 x 8.3 x 5.3 in. (17 x 21 x 13.5 cm)
- Weight: 5 lbs (2.2 kg)
- 2 year warranty
