

Celltreat Plasteur Sterile Polystyrene Pasteur Pipets

Description • CELLTREAT Plasteur Polystyrene Pasteur Pipets offer the aspirating precision of a glass pipet and the safety benefits of plastic

- Available in two sizes: 5.75 and 9 in. for easier handling and longer reach for working with larger vessels
- Made from medical grade virgin polystyrene, which provides the chemical resistivity needed for many applications
- Sterile (gamma irradiated) pipets are available either individually wrapped packed 50 per bag or bulk packed 25 per re-sealable bag

Image(s) are representative of the product group and not necessarily the individual product.
