

Celltreat Double Ended Cell Lifters

Description • Unique double end design features 19 mm beveled edge flat blade on one end and J-Hook (Cat. No. 630-10743) or Narrow Blade (Cat. No. 630-10740) on the other

- The J-Hook version is curved on the end to vertically lift cells from 6, 12, 24 and 48 well plates
- The Narrow Blade version is tapered to fit into 96 well plates or micro centrifuge tubes and can be used to re-suspend stubborn pellets
- 19 mm beveled edge flat blade ensures even contact with growth surface of flasks and dishes
