

Celltreat Filter System, PES, Sterile

Description Filter Systems

- Angled hose barb adapter fits 3 size hose diameters and increases unit stability
- Polyethersulfone (PES) membrane for high flow and low binding
- Three membrane pore sizes: 0.10, 0.22, and 0.45 m
- 0.10m PES membrane ideal for mycoplasma removal
- 0.22m PES membrane is the first choice for sterile filtration of cell culture media
- 0.45m PES membrane ideal for solution clarification
- Filter systems include bottle top filter and solution bottle with cap
- Packaged sterile (gamma irradiated) in bags
