Celltreat CELLTREAT Freeze Cryogenic Vials - Internal Thread

Description • CELLTREAT Freeze Cryogenic Vials are designed for storing biological material at temperatures as low as -196°C, in the gas phase of liquid nitrogen
• Internal thread design prevents contamination and uses O-ring silicone seal to ensure positive seal at any temperature
• Available with round bottoms, or self-standing bottoms which interlock with Easy-Grip Workstation Rack, enabling one-handed opening
• Caps have textured ridges to provide gripping when wearing gloves
• Contrasting black graduations are large and easy to view
• Large white marking area provides excellent contrast for identification
• Self-standing re-sealable bags offer a unique storage solution
• Made in the USA
