

National Safety Apparel Cryogen Water-Resistant Cryogenic Gloves

Description • Cryogen Water-Resistant Cryogenic Gloves are used where the protection is to be mainly against cold as opposed to protection against splashing of liquids

- Gloves maintain their warmth and flexibility even in ultra-cold environments
- Designed to provide excellent hand and arm protection when handling ultra-cold materials and containers. Proprietary ePTFE/laminate nylon material
- 3M Scotchlite Thinsulate liner
- Ideal for use in research laboratories, frozen food processing, aerospace, welding supply companies, and for the handling of dry ice
- Meets standards EN 511 Convective Cold Performance Level 3 and EN 511 Contact Cold Performance Level 2
- Made in the USA
- Sold per pair
