

XRF Scientific Platinum Standard Dishes

Description • Made from 99.95% pure platinum and platinum alloys, these standard dishes have thicker bases and lighter walls that help them endure harsh use

- Dishes and lids are sold separately

- XRF Scientific Platinum Labware is the reference brand for labware, for XRF sample preparation or all other analytic methods. Produced in house from melting to the finished product XRF Scientific is setting the benchmark for high quality platinum labware - everything from one source, worldwide

- Their crucible line offers a wide range of dimensions and variations suitable for every need in the analytical lab
