

gako unguator* Jars, 1000 mL

Description • All unguator* jars operate on the patented "piston-principle" design

- All ingredients can be weighed into the mixing jar at the same time
- Closed environment achieved in the container eliminates the problems of air intake and contamination
- The jars serve simultaneously as:
 - Measuring Unit
 - Mixing Chamber
 - Storage Container
 - Dispensing Jar
- All materials and ingredients remain in the closed jar throughout the mixing process
- Final product represents a consistent, superior blending result with:
 - Extended shelf life
 - Significant time and cost savings
 - Accurate, specific dispensing
 - Minimal clean-up
- Made from a durable polypropylene/polyethylene plastic
- Can be heated in a hot water bath or microwave oven
