

Veltek DECON-AHOL WFI* Formula Sterile 91% Isopropyl Alcohol (IPA)

[SDS](#)

Description • VAI's DECON-AHOL* Products are formulated with USP Isopropyl Alcohol (IPA)

- DECON-AHOL 91% USP IPA with USP Water for Injection (WFI) has been designed specifically for pharmaceutical, biotechnology, healthcare, and medical device cleaning rotations for use in both aseptic and non-aseptic environments
- DECON-AHOL WFI Formula can be used for the decontamination of numerous surfaces within any cleanroom operation
- Each lot of DECON-AHOL is sterility tested according to current USP Compendium, is completely traceable, and has been completely validated for sterility and shelf life
- One gallon containers are an excellent choice for GMP operations that require a large volume of solution

- Raw components are air washed with 0.2 micron filtered air
- Filled in an ISO 5 (Grade A/B, Former Class 100)
- Filtered at 0.2 microns Gamma irradiated at a 10^{-6} SAL
- Lot sterility tested according to current USP compendium
- Completely lot traceable from start to finish
- Completely validated for sterility and shelf life
