

California Pacific Labs 4 in. ECO Funnel* System, 5 gallon with Stainless Steel Quick Disconnect

Description • This 4 in. ECO Funnel* system includes a 5 gallon Justrite* Poly HPLC Waste Disposal Cans with Stainless Steel Quick Disconnect fittings

- Our patented ECO Funnel features a latching lid with gasket to keep fumes contained
- A removable large particle filter catches stir bars or other items
- This funnel connects to the QD fitting on one side of the safety can, allowing unfettered access to the large opening
- The safety can offers a safe and easy way to collect liquid waste
- Durable polyethylene container with large, strategically placed opening facilitates controlled pouring into larger vessels for proper hazardous waste disposal
- Opening is equipped with a stainless steel flame arrestor which dissipates heat to prevent flashback ignition
- Fixed position latch on handle allows lid to stay open for easier pouring
- Translucent color lets you check liquid level at a glance
- FM Approved

- The ECO Funnel is the ultimate lab safety product for collection of hazardous liquid waste
- Its unique, patented design performs two functions, acting as both a sealed waste container and also as a solvent funnel
- The 4 in. ECO Funnel* is made of HDPE and has a 450 mL fluid capacity
- This solvent waste funnel is designed with a custom screw cap which secures it to a specified waste container
- It also features a closed-cell HDPE gasket inside the lid and a sturdy positive latch which ensures the lid remains securely closed
- A removable filter is also built into the interior to reduce the loss of stir bars or other large particles in the waste liquid
- The ECO Funnel is a pass-through system, meaning chemicals are not sitting in the funnel for any length of time, so it's HDPE construction is compatible with most solvents including those that need to be stored in glass

Benefits of ECO Funnel*

- Solves the &q
